# jQuery Hands-on-Lab

# Exercise 1: Signup/Login form widget

- You have to design a Signup/Login form widget as per the sketch given in next slide.
- Implement a functionality to display Signup form initially and if user clicks on "Already having an account", hide the signup form and display the login form
- For login, use Autocomplete for Phone Number/Email field
- All form fields must be validated (use appropriate validation rules)

Exercise 2: Online Scheduler

- Create a scheduler as illustrated in the next slide
- Use jQuery to add appointments dynamically
- Depending on the task category, the date field must be displayed with the corresponding color in the calendar

October, 2010
